

CAN.dy Dance Project — Bylaws Adoption & Officer Acknowledgment

Superseded. Do not fill this in.

This document existed to collect four wet signatures adopting the bylaws. The membership system now does that better: Article 20.1 gives a checkbox the same effect as a handwritten signature, Article 20.2 ties each record to a specific document version, and Article 20.3 makes the records append-only, so they cannot be quietly backdated or altered. A scanned PDF in a Drive folder has none of those properties.

To adopt the bylaws: each officer signs in to the system and acknowledges the current version of the Bylaws. That produces the record this document was trying to produce.

Kept as a file rather than deleted so the history explains itself, and because `bank_resolution.md` — which a credit union relies on, not this Team — still needs real signatures and should not be confused with this.
